

Top Reasons to Upgrade Your Smart Spud

Agent QC Desktop

Our new Desktop Software program is simply the best available for reporting structure and keeping detailed records.

- Email Reports including all pertinent data and notes
- Name and Rename Files for better record keeping
- Track file duration and date stamp
- Utilize central reporting structure to one manager from various facilities
- Change / add and delete events and flags
- Detailed reporting element for discussing various changes and activities for managers
- Easily transfer files from Palm.

Signal Strength

Our new systems signal strength has greatly improved and has now become consistently reliable. We are aware that our older models had some signal issues and we have been successful in listening to our customers and delivering a new more durable and reliable system. Our signal strength tech support calls have decreased over 78% in the past 14 months. The main reason for our increased signal is the addition of our **Receiving box**. This innovative tool clips to your belt buckle or fits in your pocket. It is easy to replace the battery as it is a simple 9V off the shelf battery. The on/off switch is non-intrusive hidden inside the battery closure. We have also included an LED light to let you know when the unit is on and receiving properly.

New Palm Technology

Utilize fully functioning palm pilots now come with email capabilities, Bluetooth technology and multi media functionality for your enjoyment, as well as your day timers, calendar and other palm software applications.

Lighter / Rounded Capsule

Our new lighter more rounded capsule casing houses our circuit boards and operational sensor. With this new capsule we have received very positive comments about the data coming through and its more appealing shape, size and weight.

SD Card

All new kits come completely preloaded with software and also with an SD 256 MB Memory Card which contains backup files for your palm software application. If your Palm goes dead there is no need to have to hot sync through the computer to load your software, simply utilize the drop down bar and select our software files to load and you are up and running.

Software Updates

Sensor Wireless Inc. is striving to streamline our software with updating capabilities that roll over year to year and allow your systems more compatibility from year to year. All updated systems are also eligible for free software updates for 1 year from purchase. Another key feature we are implementing with the launch of our new website www.sensorwireless.com you will have the capabilities to get updated technology at your leisure when you register your product. (Coming 2007)

Serial Cable

This serial cable connects your receiving box to your Palm and also doubles as your download cable connecting your palm data to your NEW Agent QC Desktop Software. This also adds to our increased signal reliability.

Manuals and Literature

Our new manuals have a cleaner easier to follow format, and includes tips and hints on how to get the most out of your Smart Spud. We will soon come out with Spanish and French versions of our instruction manuals.
